Electrical Engineering graduate with hands-on experience in power plant operations and substation maintenance. Inspected and maintained 10+ critical electrical assets while supporting system reliability. Specialized in equipment reliability analysis, preventive maintenance planning, and high-voltage systems. Demonstrated ability to identify root causes and drive efficiency improvements through data-driven analysis and technical problem-solving.

Education Level

Universitas Jenderal Soedirman  - Purbalingga	Aug 2022 - Mar 2026
<i>Bachelor of Electrical Engineering, 3.65/4.00</i>	
- Bronze Medal Essay Competition MEC 2024 3rd Winner PKM Rektor Cup 2023	

Work Experiences

PT PLN Indonesia Power UBP Mrica - Banjarnegara	Sep 2025 - Nov 2025
<i>Electricity HAR</i>	
- Executed inspection and preventive maintenance on 5+ critical electrical assets (generators, transformers, MV/LV switchgear) across 2-week inspection cycles, maintaining 95%+ system availability - Supported commissioning and recommissioning through wiring verification and functional testing - Identified fault indications and coordinated corrective maintenance, reducing unplanned downtime risk	
PT Sumber Segara Primadaya - Cilacap	Jan 2025 - Feb 2025
<i>Maintenance Building Electrical Unit 1&2</i>	
- Maintained operational reliability of ESP and high-voltage systems through bi-weekly inspection and preventive maintenance on 2+ independent electrical units - Evaluated insulation resistance and cooling system performance to detect equipment degradation	
PT PLN (Persero) - Cilacap	Jul 2024 - Aug 2024
<i>JarGI Operations Assistant</i>	
- Conducted in-service inspection and measurement tests (IL1 & IL2) on 10+ substation equipment components to assess operational condition across 3 substation zones - Analyzed inspection data to detect abnormalities and support corrective maintenance decisions	
CV Multiservice - Cilacap	Oct 2021 - Dec 2021
<i>Assistant Technician</i>	
- Completed troubleshooting and repair of 20+ electrical appliances (AC units, refrigerators, washing machines) with 90% repair success rate - Delivered technical solutions to 20+ customer cases & improved issue resolution efficiency by 25-30% through systematic diagnostics approach	

Organisational Experience

Himpunan Mahasiswa Teknik Elektro - Purbalingga	Aug 2023 - Dec 2023
<i>PLC Programmer</i>	
- Developed PLC control systems (traffic light, water automation) using CX-One ladder logic - Delivered training session to 30+ participants on industrial automation applications	
Soedirman Robotic Team - Purwokerto	Sep 2023 - Dec 2023
<i>Staff Mechanic</i>	
- Designed robotic arm 3D models using SolidWorks, optimizing structural integrity - Conducted performance analysis evaluating material stress and precision control	

Skills, Achievements & Other Experience

- Hard Skills:** PSIM, AutoCad, CX-One, Factory IO, Proteus, SolidWorks, ETAP, Microsoft Office, LATS-HVAC, LATS-Load, PVsyst
- Soft Skills:** Analytical Thinking & Problem Solving, Data-Driven Decision Support, Technical Reporting & Documentation, Cross-functional Collaboration & Adaptability
- Certification**  (2021): Awarded a Certificate of Competency in Electrical Power Installation Engineering from SMK Negeri 2 Cilacap.
